

Commercial Use Terms

By indicating that this application may generate revenue, include ads, have paid upgrades, charge fees, or subscriptions, you are opting into a Commercial API Plan.

Agreement Update: If you previously held a non-commercial agreement for this app (e.g., the limited free plan), upgrading to this paid plan supersedes and releases you from that non-commercial restriction for the API use for this application.

By accepting, you acknowledge the following:

Commercial Rights for Copyright Bibles: Only the specific copyright Bible commercial licenses you have selected and added to your commercial paid plan, or can add after subscribing, are eligible for commercial use. Any free or non-commercial Bible license and content accessed from prior agreements, or prior API access, are not included, and must be removed from your app prior to commercial uses.

Creative Commons Responsibility: You bear the full responsibility to confirm that any Creative Commons Bibles you access via [API.bible](https://api.bible) allow for your specific use case. (For example, you cannot use a CC-NC "Non-Commercial" Bible for a revenue-generating app). Please verify restrictions at creativecommons.org, and license information for Bibles provided via [API.Bibles](https://api.bible) in the metadata of the `/bibles api.bible` endpoint.
